Description

MEN 5329

From award-winning designer Michael E. Nelson comes the newest addition to our Cottage House Collection. Wood Creek Cottage is a functional floor plan that allows for the full maximization of space. Its classic white exterior paired with fine craftsmanship of stone trim and wood framing is sure to attract anyone's gaze. A two-car garage offers even more space, and a front porch below a beautiful awning makes for a perfect welcome to guests. Inside you will find a great room that will take your breath away, with its high ceilings and optional gas fireplace. To the left are the kitchen and dining room, and to conserve space, the pantry is conveniently located in an adjoining hallway across from the laundry room. Value your time outdoors? Pop a squat on the charming grilling porch, which can be accessed not only from the great room, but also from the dining room and

master suite. The master suite is on the right side of Wood Creek Cottage and enjoys a ten-foot ceiling and an impressive walk-in closet adjoining the master bathroom. The master bathroom includes a walk-in shower and dual vanities, although you have the option to replace the walk-in shower with a free-standing tub and shower. Bedrooms 2 and 3 are also on the right side and share a bathroom located just outside bedroom 3. How would you customize this amazing house plan?
